PROFESSIONAL SUMMARY

- MERN Stack Developer and Software Engineering student with practical experience in building full-stack web applications.
- Proficient in modern frontend technologies including React.js, Next.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, and shadcn/ui.
- Strong experience with React ecosystem tools such as Context API, React Hooks, and Redux Toolkit for efficient state management.
- Skilled in backend development using Node.js, Express.js, and PHP, with hands-on experience in designing scalable RESTful APIs.
- Experienced in real-time application development using Socket.io for live chat and interactive systems.
- Solid database knowledge including MongoDB and SQL/MySQL for schema design, querying, and optimization.
- Working knowledge of Python for scripting and problem-solving tasks.
- Familiar with authentication systems, responsive UI design, and performance optimization techniques.
- Strong analytical thinking, debugging skills, and ability to deliver clean, maintainable code in collaborative environments.

EXPERIENCE

2024 - NOW

FREELANCING

WEB DEVELOPER

- Developed full-stack web applications using MERN stack, PHP, and SQL.
- Built responsive and user-friendly websites.
- Optimized performance and improved user experience.
- Delivered customized solutions based on client requirements.

2023-2024

FREELANCING

GRAPHIC DESIGNER

- Designed logos, social media posts, brochures, and marketing materials.
- Worked with Adobe Photoshop, Illustrator, and Canva

TECHNICAL EXPERTISE

1. Full Stack Development:

Proficient in building end-to-end web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Next.js. Experienced in designing and developing RESTful APIs, real-time features using Socket.io, and responsive front-end interfaces with modern UI practices.

2. Front-End Technologies:

Strong command of HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, and shadcn/ui. Skilled in React.js development using Context API, React Hooks, and Redux Toolkit to create interactive, scalable, and user-friendly interfaces with high performance and accessibility.

3. Back-End Technologies:

Hands-on experience with Node.js, Express.js, and PHP for building secure and scalable server-side applications. Adept at implementing authentication/authorization systems, API integration, and real-time communication features.

4. Database Management:

Solid experience with MongoDB and SQL/MySQL databases, including schema design, indexing, query optimization, and efficient data handling for high-performance applications. Familiar with Firebase Realtime Database for live data synchronization.

6. Problem Solving & Debugging:

Strong analytical and troubleshooting skills with the ability to debug complex issues, optimize application performance, and deliver clean, maintainable, and production-ready code under deadlines.
